National Defense University (NDU) develops critical thinkers, joint warfighters, and strategic national security leaders equipped to understand, develop, and employ strategies that incorporate all elements of global peacekeeping and national power to prevail against the threats of today and tomorrow.

The NDU Foundation engages military and diplomatic senior leaders with private sector thought leaders and subject matter experts within and across the national security industrial complex. These partnerships offer corporations relevant opportunities and engagement into current national security issues, allowing business leaders to adapt operational strategies to better match the priorities and objectives of DoD, Homeland Security, and other agencies charged with our national security.
