

# National Defense University Foundation Industry Innovation Series

## Joint All-Domain Command and Control (JADC2): Achieving Information Dominance of the Battlespace

You are cordially invited to join us for an exclusive, interactive dialogue with Department of Defense, private sector, and thought leaders behind JADC2, one of the most important initiatives that the United States military will undertake in its history.

In today's digital world, integrated information is essential, and speed is everything. Joint All-Domain Command and Control (JADC2) is a game-changing initiative to maintain

decision advantage over competitor nations, but siloed data and proprietary systems hamper progress. Industry and government working together offer a path to synchronize the power of U.S. military forces, allies, and partners.

This first-ever, behind-the-scenes discussion amongst JADC2 leadership will provide the latest updates on capabilities, progress, challenges, and opportunities in an invitation only setting.

**Monday, April 18, 2022 | 9:00 a.m. to 12:00 p.m.**  
**Lincoln Hall, Fort McNair**

### DISCUSSION TOPICS:

• Network Infrastructure • Fabric • Integration • Culture
